For businesses ready to optimize and scale existing marketing efforts with SEO, paid media, email, and UX improvements.

- **Marketing Mix Modeling (MMM):** We use data-driven insights to measure the impact of each channel and allocate resources efficiently.
- **Cross-Channel Synergy:** The same content fuels SEO, email, and paid social; PPC data informs content strategy; PR links boost organic rankings.
- **Seamless Scaling:** As your business grows, we shift effort and budget between channels, adapting to market conditions and opportunities.

RYAN'S SYNTHESIS (aka the 3-4 modules to add to MVP site 1)

A main point for "WHY OMNI COMMON?": OLD siloed MULTI-CHANNEL MARKETING IS DYING, especially since search (google) is being disrupted by AI (chatGPT search, etc.) and since people continue to search more on social media. So where you used to be able to get away with a siloed approach to growth, you can no longer. You need a holistic approach that integrates channels and uses the right marketing mix at the right levels to create brand awareness, inbound leads and a solid sales pipeline/process.

You need an executive marketing agency to put all that together for you and execute on it.

"Grow your brand(s), according to plan"

Ryan Charles

I'm actually really drawn to that one.

- It makes it about them, personalizes it with "your"
- "according to plan" implies there is a plan and things are in control and on track with it. We can say we "plan and create" that growth somewhere else. I like that phrase a lot
- I would legit put "brand(s)" with the parenthesis "s" because so far almost every client I've worked with has had multiple brands and one of their biggest questions is their brand strategy across multiple brands (huge selling point!!! Get it this in there somewhere if it isn't already). This is also a great subliminal nod to holding companies and private equity companies that have portfolios of brands

AND “plan” is a very commonly used term used in biz to mean “the budgeted / modeled target”. You may recall in Porch we had “fp q1” “fp q2” which stood for “financial plan quarter 1” and we would compare “actuals” (actual performance) against “plan”
